PROFESSIONAL SUMMARY

Results-driven Software Engineering undergraduate at NSBM Green University with hands-on experience in fullstack and mobile application development. Proficient in React, Next.js, Java EE, Python, and Flutter with crossplatform mobile development expertise. Demonstrated ability to design, develop, and test scalable applications using Agile methodologies. Seeking a software engineering internship to apply technical skills, contribute to a professional team, and accelerate growth in a real-world development environment.

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, HTML5, CSS3, Responsive Design, UI/UX Prototyping

Mobile Development: Flutter, Dart, Cross-Platform Development, BLoC/Provider State Management, Android & iOS

Programming Languages: Java, Python, Dart, JavaScript, SQL

Backend & Frameworks: Java EE, Node.js, Express.js, .NET, MERN Stack

Databases & Tools: SQL Server (SSMS), Git, GitHub, Figma, Streamlit

Core Competencies: OOP, Software Quality Assurance, REST API Integration, Manual Testing, Agile/Scrum

EDUCATION

BSc (Hons) in Software Engineering

NSBM Green University, Western Province, Sri Lanka | Expected Graduation: December 2027

- Coursework: Object-Oriented Programming, Software Quality Assurance, Web Application Development, Database Management, Mobile Application Development, Agile Software Engineering

G.C.E. Advanced Level – Physical Science Stream

Combined Mathematics – S | Physics – C | Chemistry – C

ACADEMIC & PERSONAL PROJECTS

Cross-Platform Mobile Application — Student Utility App

Flutter · Dart · BLoC/Provider State Management · Android & iOS

- Built a fully functional cross-platform mobile application for Android and iOS from a single Flutter/Dart codebase, eliminating platform-specific development overhead.
- Implemented BLoC and Provider state management patterns to maintain predictable, testable UI state across complex navigation flows and multiple screens.
- Designed a clean, intuitive UI adhering to Material Design guidelines, with custom widgets for reusable components and consistent theming.
- Optimised widget rendering pipeline and implemented lazy loading strategies, achieving smooth 60 fps performance even on low-end Android devices.
- Integrated local data persistence and real-time UI updates, enabling offline-first functionality for improved user experience.
- Conducted cross-platform testing across multiple device form factors and OS versions to ensure consistent behaviour on Android and iOS.

Modern Web Application Interface

React.js · Next.js · Figma · UI/UX Design

- Designed and developed a fully responsive frontend web application prioritising user experience and accessibility.
- Leveraged Next.js dynamic routing and server-side rendering to improve page load performance by ~40%.
- Built a reusable component library in React, reducing code duplication and improving maintainability.
- Created end-to-end design systems in Figma (wireframes → high-fidelity prototypes) before translating to production code.

Enterprise Application Module

Java EE · SQL Server (SSMS) · OOP

- Engineered a scalable backend module using Java Enterprise Edition applying SOLID OOP principles.
- Designed and integrated a relational SQL Server database with optimised queries for secure CRUD operations.
- Implemented layered architecture (DAO, Service, Controller) to support future extensibility.

AI-Powered Assignment Helper

Python · Streamlit · Groq API · REST API Integration

- Developed a lightweight AI-driven web tool using Python and Streamlit to assist with content generation.
- Integrated the Groq API for natural language processing, handling text inputs and generating structured outputs.
- Deployed with an intuitive UI enabling non-technical users to interact with AI capabilities.

EXTRACURRICULAR & PROFESSIONAL DEVELOPMENT

Student Research Participant – NSRSIT 2026

NSBM Student Research Symposium on Information Technology | 2026

- Engaged with cutting-edge research in software engineering, AI, and emerging technology trends.
- Networked with academic professionals and industry peers, broadening understanding of research-driven development.
